

PawPoller Upload Test

by KnaughtyKat

This is a test PDF generated by PawPoller's posting module to verify the FurAffinity upload pipeline.

It contains fake story content to simulate a real submission. The actual stories would be the full PDF exports from the story archive.

Chapter 1: The Test

Lorem ipsum dolor sit amet, consectetur adipiscing elit. The quick brown fox jumped over the lazy dog, except in this case the fox was anthropomorphic and the dog was running a coffee shop.

"You want the usual?" the Doberman asked, adjusting her apron.

The wolf nodded, sliding into the booth. "Make it a double. Long night."

Chapter 2: The Verification

If you can read this on FurAffinity, the upload pipeline is working correctly. This PDF was:

- Generated programmatically by PawPoller
- Uploaded via the 3-step FA form scrape (GET key, POST upload, POST finalize)
- Thumbnailed with the Extra Credit cover art
- Left as a draft for manual inspection

This submission should be safe to delete after testing.
